FANATIC

RADICAL WAVE QUAD TE

Under the lip. Down the line. If you're a wave-riding purist, the Quad is your Waveboard. Designed to operate at maximum performance close to the curl, the Quad has been tuned up even more. A new scoop rocker line with a reduced concave/double concave bottom shape, plus the wider center with a flatter deck, offers simple stability combined with the snappiest of turns. An early planing, easy-to-use board – designed for radical wave action. Ride the Quad, and rip the wave to pieces.

KLAAS VOGET

ALESSIO STILLRICH

NAYRA ALONSO

KEY FEATURES

- Wider center with flatter deck for early planing and easy balance and stands
- Side fins with slight tow for perfect water flow, maximum grip, and projection
- New scoop rocker line with a lower entry and slightly more tail rocker for surfing action and speed
- Short and compact outlines for tight radius turns
- Rounded square tails for additional projection and snappier turns

RADICAL WAVE
TRI WAVE TE

Meet the brand new TriWave. Completely redesigned for 2014, each of the six sizes features a tuned-up shape that begins with an overall wider and more compact outline. Super-easy and user-friendly. This is the board for all-around wave conditions. Ride your TriWave as a thruster and enjoy the full performance of a radical Waveboard, or turn it into a single fin, to give you maximum planing power and drive down the line. TriWaves fill the gap perfectly between FreeWaves and Quads.

KEY FEATURES

- V-bottom shape with light, tuned double concaves for smooth flow, helping accelerate out of turns
- Wider center with flatter deck for early planing and easy balance and stance
- Side fins with slight tow for perfect water flow, maximizing grip and projection
- SlotBox sidefins with US center box offer maximum tuning abilities

FREESTYLE / WAVE

FREEWAVE TXTR | TE | CWS

The original FreeWave was built with one thought in mind: to offer ultimate freedom on any wave the ocean can create – for every sailor. As we approached 2014 we were tasked with a new challenge: how to make the best even better? Fanatic proudly introduces a completely new design for the 2014 FreeWave range in the sizes 76, 86, 96, 106, 116. FreeWave TE or TeXtreme is available as Thruster or a Single fin. Choose between the lightest technology available or the best value-for-your-money construction.

KEY FEATURES

- Fish tail and rounded nose, slightly shorter and more compact
- New CAD designed scoop rocker line
- Slight V and double concave bottom shape
- Fuller, smoother rail in the nose area, with higher apex and more tucked-under edge
- Flatter mid deck section for better stance and volume efficiency

<p>FREEWAVE TXTR 86 WIDTH 58.5cm LENGTH 233cm TECHNOLOGY TXTR IC/LF* FITTINGS MFC TF 2x11cm/1x19cm; Power Box/2xSlotBox; Sailsizes: 4.2 – 6.5m²</p>	<p>FREEWAVE TXTR 96 WIDTH 61cm LENGTH 234cm TECHNOLOGY TXTR IC/LF* FITTINGS MFC TF 2x12cm/1x19cm; Power Box/2xSlotBox; Sailsizes: 4.5 – 6.7m²</p>	<p>FREEWAVE TXTR 106 WIDTH 63.5cm LENGTH 235cm TECHNOLOGY TXTR IC/LF* FITTINGS MFC TF FreeWave 29cm G10; Power Box/2xSlotBox; Sailsizes: 4.7 – 7.0m²</p>

FREESTYLE

SKATE TE | SKATE

Explosive tricks. Double and triple rotations. Pop, sizzle, and style. Whether it's in a magazine test or on the PWA World Tour, the Skate Team Edition (TE) line has a history of winning. Year after year, the Fanatic Skate and Gollito Estredo – 5-times Freestyle World Champion – have proven the dominance of this winning combo. To guarantee Gollito's quiver is never lacking, we've built 4 brand new shapes, including two models on the small side of the range. Innegra Carbon remains as a lighter, stiffer and more UV resistant laminate in the TE model's 85, 93, 101, and 111-liter sizes.

For Freestyle newbies, those practicing classic and carving moves and even small wave use we've kept the test-winning 100 and 110 models which are slightly longer and forgiving for freestyle fun at any level.

KEY FEATURES

- Shorter outlines offer the reverse length concept – bigger boards are shorter than smaller models
- New tail deck design with integrated arch support in the tail pad for a better grip and more comfort
- Thinner rails between stance for better carving freestyle manoeuvres
- Full and soft rails in the nose for easy entry into sliding manoeuvres
- Power V bottom shape for perfect sliding
